

School Scraper

AI-powered school data collection and analysis platform

What This Application Does

Automated website scanning and data collection

AI-powered data organization and categorization

Interactive comparison tools and reporting

Key Features

- One-click data collection
- Comprehensive school profiles
- AI-generated summaries
- Excel/JSON export options

Data Collected

Tuition Fees

Programs

Enrollment

Scholarships

Installation Guide

1

Initial Setup

Run the `setup.bat` file to:

- Install package manager
- Create virtual environment
- Install dependencies

2

Launch Application

Execute `run.bat` to start local server

Data Collection

1. Navigate to "Scrape Schools"
2. Select target institutions
3. Initiate scraping process
4. Monitor progress indicator

Data Analysis

1. Access "Results" tab
2. Select comparison criteria
3. Generate AI summaries
4. Export preferred format

Data Structure

Tuition

Annual fees
Payment plans
Deadlines
